

Frequently Asked Questions

Q. When would you suggest that FreshMiss™ be used?

A. FreshMiss™ was formulated for daily use and may be used at any time during the day. We suggest that you start your day feeling clean and fresh by using it while taking your morning shower or bath. Later in the day as well, after a busy day at work, after exercising, before intimacy, during your period—anytime you wish to feel clean, fresh and confident. We recommend that it be used at least once every day (up to two or three times per day maximum).

Q. How do I deal with vaginal odors?

A. Like you, many women have this concern. Sometimes odor is due to normal vaginal discharge, perspiration, etc. and will eliminate those odors without changing the natural vaginal environment.

Q. Can FreshMiss™ be used during my period?

A. Absolutely. Most women tend to be sensitive about odors during this time of the month. It is scientifically developed to gently eliminate odors, including pre-menstrual and menstrual odors.

Q. Can FreshMiss™ take care of residual urinary odors?

A. Yes, in fact FreshMiss™ will gently remove urinary odors from the external genital area and provide fast-acting and long-lasting protection. It will, in some cases, even address urine leakage odors, thus leaving you feeling clean, fresh and confident.

Q. Is it OK to use FreshMiss™ in other parts of my body?

A. Sure you can. Although it was formulated as an intimate feminine wash, it can also be used all over the body. It doesn't irritate the skin and, in fact, its green tea extract conveys a soothing natural fragrance and helps you stay fresh.

Q. Can FreshMiss™ be used by men?

A. Definitely. Although FreshMiss™ was formulated for everyday freshening and nurturing of a woman's intimate area, men can use it too!
